“ Mr. K - may you rest in peace. You have taught me a ton in CPC. You are one of the main reasons I pursued a successful career in electronics. Prayers to the family.

Electronics Student - June 14, 2022 at 02:36 PM

MD

“ My condolences to Bob's family and friends. I was one of Mr K's electronics students at Mott High School in 1970. His mentorship played a big part providing me with more than just a technical education, he also instilled in me confidence to succeed in future endeavors. I look back on his encouragement with pride. Little did he know his mentoring and teaching produced a future physicist, an AF General Officer and Corporate Leader. I will always remember him for a life well lived through service to others. Michael Dudzik Mott High School Class of 1971.

“ I am so sorry to hear of Bob's passing. Bob and I went to high school, Macomb Community College, and Wayne State University together. In fact, when I made the decision as a freshman at WSU to leave and to go to MCC to study electronics, Bob decided to make the same move with me. We often studied together. We car-pooled to class together, both at WSU and at MCC. I remember our taking turns between classes to run over and feed the parking meter in front of the Detroit Public Library, where we often parked when we were freshmen at WSU. We also often shared summer jobs together, such as at Chatham's Super Markets on the night crew and at an aluminum window assembly plant near the WSU campus. I remember us going away to a beach resort in Canada for a long weekend. We arrived late the first night and tried to sleep in the car in a store parking lot, until the police woke us up and made us move. We both ended up teaching electronics at a high school. I often would see him at St. Kieran Church at the blessing of Easter baskets, when we often would catch up together. When Rachel was a student at Malow Jr. H. S., I was her Geography teacher. Bob would come to pick her up from school and we would sit in my classroom and visit. I have many warm memories of our time spent together. May he rest in peace. Ron Koscierzynski

“ Bob was a big brother to me as well. I lived a few doors away on Caldwell. He is two years older but as teenagers he took me where ever he went. High School Football games, basketball games etc. And we seemed to always end up going out for pizza afterwards. RIP Bob, God's speed

MG

“ Mr K was a beacon to all those he taught. I spent 3 hours a day for 2 years in his class at the CPC in the mid 80s. Needless to say, with that amount of time in very formative years, who he was played a big part in how I looked at and went out into the world when I graduated. Mr. K, along with Mr. A, as they were friends, co teachers, and a formidable pair to administration at the CPC, in my opinion taught us very well and prepared us for more than electronics and auto body. His humor, dedication to students, dedication to his family(he talked about his daughter and wife all the time), knowledge, skills, encouragement, and approach/attitude to life influenced the way I looked at the world at a time when things were changing for me as I entered the adulthood. I will forever be honored and grateful to have been a student of his and a recipient of all the knowledge and wisdom he imparted to me while I was in his class.
