“*I certainly enjoyed knowing Mike through dentistry. He and I along with 8 other dentists began a dental study club in 1975 that thrived for more than 40 years. His main contribution was The Mutual Aid Agreement which he developed and shared with many dentists. It was used when one unable to practice and needed other dentists to fill their shoes until they could return to work. This was a truly unique plan that helped many dentists in The metropolitan Detroit area. He and several other dentists helped me as I recovered from heart surgery in 1987. I was one of many who benefitted from Mikes idea. Mike was smart, kind and generous with a killer sense of humor. We all loved him and want his family to know that. Tom Bailey”*
