“*My most outstanding memory of Tom was when him and I took the boys canoeing. It was a very hot summer day and after we unloaded the trailer, I noticed Tom had his shorts on. The next minute he was walking towards the river then he sat down in the middle of the river. I was very surprised because that was the FIRST TIME I ever saw him in the water. He just sat there with the the cool water running over him. I never thought of taking a picture of him, I was too surprised.*
